

Pearson Hits Atom Monopoly

McGill Daily

VOL. XLVII—No. 40

MONTREAL, THURSDAY, NOVEMBER 21, 1957

Price 2 cents

Chem. Institute At McGill Host To CIL Speaker

Dr. Frederick White Matthews of the Development Department of Canadian Industries Ltd. will speak to the McGill Student Chapter of the Chemical Institute of Canada today.

His talk on "The Polarized Microscope" will be accompanied by a reputedly spectacular demonstration of this instrument and the principles involved in its use.

Director in C.I.C.

A graduate of Bishop's, Mount Allison and McGill Universities, Dr. Matthews holds B.Sc. and Ph.D. degrees. He is director of the membership committee of the C.I.C. and a member of the American Crystallographic Association.

The lecture will be given at 1 pm in room 250 of the Biology Building, and will be open to students and the public.

HON. LESTER B. PEARSON addresses the first plenary session of the McGill Conference on World Affairs.

U.S. Should Make Tactical Atomic Weapons Available to Europe Allies; Also Stresses NATO Interdependence

by Roger Phillips

Lester B. Pearson said last night that "massive retaliation or slow defeat" are the only present alternatives in the event of a Russian attack on any NATO country, no matter how restricted the attack might be. Pearson was delivering the opening address of the four-day McGill Conference on World Affairs.

The former Canadian External Affairs Minister went on to explain that present day NATO defenses consist of 30 divisions armed only with conventional weapons and the U.S. strategic air force, capable of retaliating with hydrogen and atomic bombs anywhere in the world. If tactical atomic weapons were placed in the hands of the individual NATO countries, the Russians might think twice before launching an attack. As things stand now it is the U.S. who has the power "to push the button" launching massive nuclear retaliation, but the communists might be willing to gamble that the Americans would not risk such a move. Tactical atomic weapons in the hands of each NATO country was another thing which would most likely prevent such an attack. At present only a small amount of tactical atomic weapons are in Europe, but under the control of the U.S.

Suez and Tunisia

Pearson went on to enlarge the present NATO plans of more military interdependence among the Atlantic countries. He also touched on non-military cooperation among the NATO members, and stressed that such incidents as the U.S. arms shipment to Tunisia and the Suez intervention should have been discussed among the Atlantic powers before any action was taken. Such disputes in the open only serve to weaken the Atlantic Alliance, he said.

Tracing the history of NATO, Pearson said that Stalin and his policies were responsible for the formation of the Alliance. In fact, he said, Stalin can be called a veritable "founding father" of the organization. The Berlin blockade and the Communist invasion of Czechoslovakia, coupled with the failure of the U.N. to provide the necessary collective security of the West, were the prime factors involved in the formation of the alliance.

The recent Soviet technological break-through in the ICBM and Sputnik fields have spurred the U.S. and others to talk about interdependence and the sharing of scientific know-how, he said. It seems to have been forgotten, Pearson pointed out, that the Committee of Three's report to the NATO Council last December recommended such a move, but that the plan was called "nice" and then pigeon-holed.

Pearson also delivered a gentle slap at the Americans for their "dumping" policy for agricultural surpluses. He said that the Canadian government might be inclined to ask why they should help the Americans militarily while they were stepping on Canada's toes economically.

Also criticised was the American McCann Act which prevents the U.S. from sharing any atomic weapons on their plans, even when the Russians themselves possess such weapons. He said that President Eisenhower was trying to repeal the law but it is the same old American story — "the President proposes but Congress disposes".

Rome and NATO

Turning again to the topic of non-military cooperation in NATO, Pearson said that "neither Rome nor NATO was built in a day." The progress in NATO's case, however, has been disappointing. He said that an air of cooperation and consultation pervades NATO when crises are at hand but this usually blows off when situations become normal. As a result the present Tunisian crisis has hit the front pages whereas it could have been solved behind the scenes before the actual decision to ship arms was made.

Pearson closed with a plea for the development of a truly interdependent NATO. "If we don't do something about this NATO will gradually disappear," he said, adding that this would only serve to benefit the power which NATO was formed to oppose.

A question and answer period followed in which the delegates were able to raise problems issuing from Pearson's speech. In particular Pearson said that despite the pressing need for a revitalization of NATO militarily, it was far better to make more progress in solving the East-West differences which made NATO necessary.

Pearson was introduced by Dr. F. Cyril James, Principal and Vice-Chancellor of McGill and Honourary Chairman of M.C.W.A. He was thanked by Pierre Lamontagne, Co-Chairman of M.C.W.A.

'Canada And U.N.' Topic Of M.C.W.A. Panel Discussion

Two distinguished educators and two well-known journalists are featured tonight in a panel discussion on "Canada and the U.N.", the second topic of M.C.W.A.

Blair Fraser, Ottawa editor of Maclean's magazine, and Gérard Filion, editor of Le Devoir, will join Professor Frank Scott of McGill's law faculty and Professor Edward McWhinney of the University of Toronto in a forum. Professor Maxwell Cohen of McGill will act as chairman.

A limited number of free tickets are still available from the M.C.W.A. office in the Union. Time of the panel discussion is 8 pm.

Panel Chairman

Professor Cohen, the panel's chairman, is now a member of the Faculty of Law at McGill. He holds the degrees of B.A., LL.B., and LL.M. He received his Master of Laws from Northwestern University and in 1938 held a research fellowship at Harvard Law School. Called to the Bar of Manitoba in 1939, Cohen came to McGill in 1946. He has been a member of several economic and international commissions and in 1951 he was appointed special assistant to the Director General of the Technical Assistance Administration of the U.N.

Blair Fraser was born in Sydney, Nova Scotia and graduated from Acadia in 1928. He has had a long and varied journalistic career working for three daily

Prof. Maxwell Cohen

papers in Montreal and since 1943 has served as Maclean's Ottawa editor. He was also a radio commentator for British, Canadian, and American networks.

Gérard Filion has been editor-in-chief of Le Devoir, one of Montreal's foremost French dailies, since 1947. He graduated at the head of his class from Laval, receiving his B.A. and the Prince of Wales prize. Until he took up his present post he was president of the Union des Cultivateurs Catholiques.

Professor Frank Scott is a Rhodes scholar and a graduate of Bishop's University. Active in politics, he was National Chairman of the C.C.F. party from

1942-1950. In 1952 he acted as U.N. Technical Assistance Representative in Burma. The author of many books on socialism in Canada, Professor Scott is a former editor of the Canadian Journal of Economics and Political Science.

Professor Edward McWhinney is a native of Australia. He has pursued his legal education at both the University of Sydney and Yale where he obtained his B.A. and LL.B. After teaching at Yale from 1951-55 Professor McWhinney came to the University of Toronto as a member of the Faculty of Law. In 1954 he was named legal consultant to the United Nations.

U.N. and N.A.T.O.

When tonight's panel comes to a close two fields of utmost importance to Canada will have been reviewed. The Hon. Lester B. Pearson last night discussed Canada's role in N.A.T.O. while the topic slated for discussion this evening concerns Canada and the U.N. Both these organizations involve heavy Canadian interest and commitments.

Cafeteria Closes

The Union Cafeteria will be closed on Thursday and Friday between the hours of 12 and 1 pm, to allow delegates to the MCWA Conference to have lunch.

Editorials

Security Or Maturity?

An acquaintance of ours is fond of remarking on what he calls the lack of eccentricities amongst McGill students. It seemed that he always dreamed of coming to college and finding there a hotbed of non-conformity. There is a much more serious variation of this attitude prevalent in many circles these days — the idea that this generation of students is dull, too serious, have career fixations, are in short the "no-nonsense" generation.

The chief concern of these critics is the emphasis which young people are putting on security. The plans of this generation seem to be well-formulated quite early and to be geared along lines which would provide a comfortable living as soon as possible. We cannot see reason for concern here; the whole point of the struggle of humanity for years has been security. Now that a high degree of security in creature comforts does seem to be possible in North America it would seem that the very generation that helped to provide this security is criticising its offspring for taking advantage of the fruit.

Can we blame this generation for wanting such security as it can guarantee itself? The problems they have to face are greater than have ever faced any other generation. They live in a world where events of startling dimensions have become everyday happenings; they are beset by strains which have made many of them grist for the psychiatrist's mill; the problems they face are manifest and bewildering. It seems that the least they can do for their own equilibrium is to secure what elements can be made certain in this turbulent world.

Besides a drive for security need not indicate, as our critics imply, a dearth of a spirit of challenge or the heroic. The areas in which the opportunity for adventure are now prevalent have changed. Rather than such activity being pointless it is now pursued with earnestness and with a goal in mind. There is less interest in being the dilettante or the rebel and more interest in the quite-as-exciting adventures of the real world. There is real interest in problems of society, in art, in science. This is not a negative generation or a beat generation. It is a generation devoted to progress, a mature generation.

Pills And Bills

In these interim days, when medical treatment is too expensive for the average person, and before petty political and material interests are put aside and Canada (and Quebec) get some sort of very necessary socialized medicine program, McGill students are fortunate that they are protected against illness to at least a certain degree. The McGill University Health Service provides very full and competent service to students who need help. It does not appear that enough students realize that they are entitled to the facilities of the Service. Its staff is invariably helpful and kind — often under trying circumstances — and the student is assured of the best possible medical service.

We often complain that university authorities do not provide adequately for students, yet such facilities as the Health Service indicate that at all times the welfare of the student is most diligently guarded. Two free psychiatric treatments are given to those who may need such treatment. There are arrangements with the Royal Victoria Hospital that provide for some hospital treatments. No student need ever be ill and uncared for. The Health Service is one of those quiet but gratifyingly effective organizations that make the world go round in a liveable condition. There are many other such facilities on campus which students may take advantage of. Seek them out. They will help.

There are many people "behind the scenes" who make this university carry on. They are not often recognized or rewarded by anything other than the satisfactions of their work. But it is a necessary work, and we are most grateful.

Letters To The Editor

Question For
Lester B.

Sir:

It is truly an astounding thing that in an hour-long speech on international relations, heard by hundreds in Moyse Hall and thousands over the radio, that the Hon. Lester B. Pearson did not once refer to the main problem of international relations. In fact, his only reference to it was in the last half of the last parenthetical sentence at the end of an answer to a question when he was off the air. That problem is: bettering East-West relations.

Mr. Pearson said, of course, that the Soviet ICBM makes obsolete the whole military defense strategy of NATO. And he logically suggested that even if the US can catch up now, the result will at best be a "nuclear stalemate", a "peace balanced on terror."

And yet the only solution that Pearson suggested is the development of smaller "tactical bombs" (distinguished from strategic presumably because they only wipe out one tenth as many people) that can be used without starting a total war. Along with this, Pearson calls for a real "pooling" of military power among NATO powers, which he admits would necessarily leave the decision to "push the button" in the shivering hands of a frightened Pentagon general.

Surely, surely, the only possible solution left to western countries is to develop as quickly as possible the kind of friendly relations with the East that will make the possibility of war more remote.

The question that Canadians must ask about NATO, now that it is proved militarily obsolete, and the question that must be asked by the delegates to MCWA today, is:

Does NATO contribute to or impede the development of friendly relations with the east, who, after all, are the ones we have to learn to live with if we want to avoid war. Does it help or hinder this all-important international task for Canada?

Bill Willmott, M.A. 1

Maligned
Professors...

Sir:

I think that the ideas of the various governments to make education available to more of the younger generation by supplying financial aid in the form of scholarships, are doomed to fall short of their intended end. It seems to me that these "great men" are losing sight of the fact that in order to educate, you must have educators. How is McGill University expected to turn out more and better engineers and other graduates when it is so financially strangled that it has to appeal to the public in order to obtain \$6,000,000 to make improvements and enlargements which should have been made more than ten years ago? The governments seem to think that by making money available to students they will solve the problem of the western world's scientific backwardness, however, if they wish to compete with Russia, why do they not put the educator on an equal footing with his Russian counterpart.

In Russia the professor is a highly respected member of the society and is the possessor of great prestige, while here, about all the professor has is his degrees and the respect of some of his students. It seems that everyone forgets that the professor is a victim of inflation just as much as is a non-operating member of the railway, and while they don't revert to striking, each year more and more professors are forced to join the ranks of industry in order to survive in our "money mad" society. Thus I think that if the governments wish to catch up to Russia (and I am sure that they do) they should first loosen their purse strings in the direction of the universities, for these many

scholarships which they are contemplating will be utterly useless to their bearers if there is no room, nor facilities nor professors to accommodate them.

Dartmouth Speaker Lecturing on Sound

Dr. Millett Morgan, of the Department of Engineering of Dartmouth College will speak on "Whistlers and other Low Frequency Phenomena", this Friday in MacDonald Physics Laboratory. A record in the series "Sounds of Our Time", put out by Emery Cook will serve to help Dr. Morgan in illustrating his talk.

Dr. Morgan will be the guest of the McGill Physics Society which is composed of the staff, graduates and senior undergraduates of the Physics Department.

This lecture, which is scheduled for 4:30 pm, is open to the public.

CORRECTION

It was reported in error that Jim McQueenie, who is now coaching the Women's Squash team, was associated with Harvard University. Mr. McQueenie is not in any way associated with Harvard University or its squash team and we wish to apologize to any whom this article may have caused any inconvenience.

Tickets For Panel

A limited supply of tickets is still available for the panel discussion on Canada and the U.N. tonight at 8:30 in Redpath Hall. These tickets are free.

I.B.M. Machines Used In Rushing

HANOVER, N.H. — It would seem that International Business Machines, Inc., has finally come into its own. Their machines have been picking pledges for Dartmouth fraternities.

About 500 Dartmouth students took part in a one-week rush period this year. Prospective pledges visited the different fraternity houses for rushing functions and met the members of each house. At the end of the week fraternities made up lists with the names of students that they wanted to pledge. At the same time, rushees filled out IBM cards indicating which fraternities they wished to join.

The lists were then transferred to IBM cards, and, along with the rushees' cards, were fed into the machines. The resulting list matched fraternities with rushees.

Arts and Crafts Show by Scope

An arts and crafts show will be presented by Scope from Jan. 27 to Feb. 1. Students wishing to enter an exhibit in this display are asked to leave their name and phone number with George at the Union Tuck Shop.

Preparations For 'Master Builder' Near Final Stages

(Peter Rehak Photo)

A PROSPECTIVE STAR assists in selling tickets for the Players' Club production of the "Master Builder", by Ibsen.

That mainstay of campus theatrical activity, the Players' Club, is once again getting near the final stages of their production "The Master Builder" which will be presented Nov. 26th to 30th in the Union Ballroom.

The production and "behind the scenes" staff, is working long hours in preparation for opening night. Herman Zloklikovitz and his assistant Alec Kowaluk who are billed as "set constructors" are busily spreading paint on a large piece of canvass on the floor of the Ballroom. They assured the Daily last night that "something will come of this".

Tickets are on sale at the Union from 12 to 4 pm and in the Arts Building from 12 to 2 pm daily under the supervision of Brenda Kaufmann. The Ibsen play will be produced by Dick Dibben and directed by Norma Springford. The latter has directed the club's productions for several years. Brian Pearce will act as stage manager while Colin Grieg will be in charge of lighting with technical advice from Bill Springford. Costumes will be designed by R. Lorain.

"The Master Builder" is the story of an architect who has problems. Dick Dibben, who is studying Architecture, assured the Daily that Harvard Solness, the play's architect, is not the only one who has problems. Dick, operating out of a hole in the wall opposite the Daily's (own hole in the wall) in the basement of the Union has been occupied for the past two months along with his staff with the many problems presented by a theatrical production.

Coming EVENTS

THURSDAY, NOVEMBER 21

G.I.C.: Dr. F. Matthews of C.I.L. will demonstrate the Polarizing Microscope at 1 pm in room 250 of the Biology Building.

CANTERBURY: Study Groups on Christian Belief at 3479 University St., 1-2 pm. New group 5-6 pm.

CHRISTIAN FELLOWSHIP: There will be a bible study on "Prayer" today in Room 145 in the Arts Building from 1-2 pm.

DEBATING: Debate in Room 306 of the Engineering Building at 1 pm. The topic will be "Resolved that Sputnik is here to stay".

HILLEL: Folk music programme to be led by Evelyn Morris at 1 pm. Choral group meets at 8 pm.

INDIA STUDENTS SOCIETY: A film depicting some of the cultural aspects and scenic beauties of India will be shown in the Union at 7:30 pm.

INTERNATIONAL CLUB: Debate between Arab and Pakistani Clubs at 1 pm in the Walter Stewart Room. The topic is "Resolved that the British Commonwealth Stands in the Way of One World".

RADIO WORKSHOP: Jean McKinnon and Joe Coates will speak tonight at 7:45 at CFCF's Cole des Neiges Studio A. There will be several important announcements made.

SPANISH CLUB: Meeting at 8 pm in the Union Lounge. An election and refreshments will be served. Music will follow the meeting.

FRIDAY, NOVEMBER 22

FLYING CARPET: A general meeting will be held tomorrow in the Union Workshop, 1-2 pm. Anyone interested in any phase of production is urged to come.

FOLK MUSIC CLUB: Sing-song and films in the Architecture Building basement at 8:30 pm.

HILLEL: Bible Reading Club will meet at 1 pm. Conversational Hebrew from 12 noon to 2 pm.

NEWMAN CLUB: A dance will be held at Newman House 3484, Peel Street at 8:30 pm. Everybody is welcome.

PSYCHOLOGY CLUB: The film "Maternal Deprivation of Children" will be shown at 1 pm in Room 250 of the Biology Building. Everyone is welcome. Bring your lunch.

SOCIALIST SOCIETY: General meeting and special discussion at 1 pm in the club room. Anyone who is interested is welcome.

UKRAINIAN CLUB: General meeting. Prof. Kushnir will speak on "Lystopad" tomorrow from 1-2 pm at the Redpath Museum Lecture Hall.

NOMINATIONS

STUDENTS' EXECUTIVE COUNCIL

Nominations are called for Undergraduate Representatives on the Students' Executive Council.

Nominations must be in writing and shall be signed by twenty-five members of the Students' Society belonging to the group or groups which the Nominee is to represent. The Nominee also must sign the Nomination.

Two Representatives will be elected from the Undergraduate Students in the Faculty of Arts and Science.

One Representative will be elected from each of the following groups:

The Undergraduate Students in the Faculty of Law.

The Undergraduate Students in the Faculty of Engineering.

The Undergraduate Students in the School of Architecture.

The Undergraduate Students in the School of Commerce.

The Undergraduate Students in the Faculty of Music and in the Faculty of Divinity.

The Undergraduate Students in the Faculty of Medicine.

The Undergraduate Students in the Faculty of Dentistry.

The Undergraduate Students in the McGill School of Physical Education, the School of Physiotherapy and the School of Graduate Nurses.

Nominees must be students of the year prior to Graduation Year in each group.

Nominations must be in the hands of the Secretary of the Students' Society by 4 P.M. on Friday, November 22, 1957.

Elections will be conducted by the Students' Executive Council on Wednesday, December 4, 1957.

WILFRED HASTINGS,
Secretary-Treasurer,
Students' Society.

Swimming Team Out For Preliminary Time Trials

McGill Nov. 20 1957 — Preliminary time trials were held here today to get a look at the prospects for the Red and White swimming team and to help select a team to compete for McGill on Nov. 30 and Dec. 14 against the Canadian Amateur Swimming Association and Bowdin respectively.

Back from last year's team was Peter Rutherford, holder of the 200 yd. intercollegiate butterfly record and former holder, till this summer, of the same record in the Canadian open titles. Not present at the trials were the teams co-captains Peter Capelovitch and Charlie Evelyn, both of last year's stock.

Another member of the past team is Warmen Castle. He timed the 200 yd. breast in 2:59.9 for a first place in this trial event. Swimming against him was a newcomer to McGill Varsity, Alec Rabinovitch, who swam the event in 3:05.3.

A novice who put up a fine show was Cameron Grout. Grout is the holder of two intramural swim records and is a former member of the MAAA swimming team. He timed the 400 free-style in 4:37.16 and the 100 yd. free-style in 53.8. Swimming

against him in the latter trial were Rich Bolton, who did in 1:03.7 and Mark Lazare, who timed 1:05.5.

The only shower for the 220 free-style was Ian Semple who went the course in 2:41.0. In the fifty yd. free-style, Rich Bolton swam fastest with a time of 26.2. Following him was Allen Gordon with a time of 27.3

while John Bushner and Michael Eason swam it in 27.8. Jim Ravensdale and Garry Freidman completed the trials with times of 28.1 and 32.0 respectively.

Coach Ross Firth says that indications point to a team which will provide plenty of competition in inter-collegiate swimming circles.

CURLING CLUB

There will be a meeting today at 1 pm in the Union Ballroom. Members will be registered and dues (\$1.25) collected. Ice arrangements will also be discussed.

FORMULA for the Future

Shawinigan Chemicals is an important component in the formula for the future of Canada's rapidly expanding industry.

Through the years Shawinigan has played an important part in aiding Canadian industry in its march to greater heights and better things. Many chemicals produced by Shawinigan Chemicals are intermediates for making things important in our everyday life . . . plastics, paint, detergents, cosmetics and drugs — and many other products which make for easier living.

At Shawinigan, research is never ending in the development of new chemicals and the discovery of new uses for existing ones. Through research, Shawinigan has helped industry in Canada make great strides in nearly every sphere of our daily living.

In your own personal formula for a successful future in industry Shawinigan can play a vital part . . . for as the demand for newer and better chemicals continues to grow, so does the need for technical graduates with ability and ambition — men who are unafraid to accept the challenge of the future and to whom Shawinigan Chemicals Limited can offer a technical career full of opportunity.

For information regarding Shawinigan Chemicals' wide range of technical careers, please write to: Industrial Relations Department, P.O. Box 330, Shawinigan Falls, Que.
